CAREER SUMMARY

Pursuing B.Tech. Biotechnology with a strong foundation in experimental biosciences and hands-on AI proficiency, including machine learning applications and computational analysis. I bridge technical concepts across the biotech-AI interface, with a proven ability to analyze biological data through computational tools. Complemented by 1.5+ years of operational leadership at a university incubator, where I translated research into impact by coordinating 30+ innovation-driven initiatives.

EDUCATION

B.Tech. Biotechnology with Minor in AI | CGPA: 9.14/10 July 2023 - Present
Graphic Era (Deemed to be University), Uttarakhand, India

Intermediate | CBSE | Percentage: 92.80% April 2023
Rainbow School, Saharanpur, Uttar Pradesh

High School | CBSE | Percentage: 97.40% April 2021
Rainbow School, Saharanpur, Uttar Pradesh

PROJECTS

AI Cognition & LLM Behaviour Studies Jan 2026

- Ran small experiments comparing LLM summaries vs. original articles and built a hand-coded social-media comment dataset on mental health.
- Compared human vs. LLM labels for various factors, highlighting cognitive offloading.
- Developed strong skills in operationalizing abstract constructs & conducting human-AI comparative analysis with lightweight computational tools.

Plant Biotechnology & Soil Enzymology Research Project (Team of 4) Sep - Nov 2025

- Conducted controlled plant growth experiments comparing biofertilizers vs. chemical fertilizers.
- Performed enzymatic assays, soil profiling, and microbial culture preparation.
- Strengthened skills in experimental design, data recording, and multi-parameter analysis.

In-Silico Molecular Cloning & Computational Sequence Analysis (Team of 4) Jan - Feb 2025

- Designed and simulated molecular cloning workflows using SnapGene.
- Performed sequence analysis interpreting computational results & drawing evidence-based conclusions.
- Strengthened skills in biological data handling, alignment, and computational modelling.

TECHNICAL & SOFT SKILLS

- AI & Cognition Research:** LLMs, prompt engineering, AI systems testing, cognitive offloading analysis, human-AI trust and reliance, experimental design for AI effects.
- Computational & Bioinformatics:** SnapGene, sequence analysis, data handling, alignment, Python basics, LLM fine-tuning fundamentals, computational text analysis.
- Wet-Lab & Analytical:** HPLC, LC-MS, SnapGene, enzymatic assays, microbial culture, experimental design, regulatory lab practices, quality documentation.
- Leadership & Communication:** Event coordination (30+ team), stakeholder engagement, scientific writing, public speaking (multiple debate/declamation wins)

INTERNSHIPS

**Intern, Clinical Pharmacology & Pharmacovigilance Department,
Sun Pharmaceuticals, Gurugram**

Jan - Feb 2025

- Supported BA/BE study workflows and clinical data evaluation.
- Operated **5+** analytical and sample-prep instruments (HPLC, LC-MS, SPE, ultrasonic bath).
- Gained exposure to regulatory documentation and quality-controlled lab practices.

**Administrative Officer, Technology Business Incubator, Graphic
Era University (TBI-GEU), Dehradun**

Aug 2024 - April 2026

- Led and coordinated a **30+** member team for operations, documentation, and events.
- Developed strong leadership, project management, and organizational skills.
- Handled social media, increasing the incubator’s follower base by **33%+** through coordinated content and outreach.
