EDUCATION

B.Tech. Biotechnology with Minor in AI CGPA: 9.14/10.00	Jul 2023 - Present
Graphic Era (Deemed to be University), Uttarakhand, India	
Intermediate CBSE Percentage: 92.80%	Apr 2023
Rainbow School, Uttar Pradesh, India	
High School CBSE Percentage: 97.40%	Apr 2021
Rainbow School, Uttar Pradesh, India	

INTERNSHIPS

Clinical Research Trainee, Mazumdar Shaw Medical Foundation, Bangalore	Jul 2026 - Sep 2026
- Supported operations and data management for a multi-centric oncology clinical trial spanning 21 sites across India. - Reviewed physical CRFs against eCRFs and supported REDCap data review and discrepancy identification. - Gained practical exposure to ICH-GCP, ALCOA+, source-data verification, randomization procedures, and clinical research workflows.	
Administrative Officer, Technology Business Incubator, Graphic Era University (TBI-GEU), Dehradun	Aug 2024 - Apr 2026
- Led and coordinated a 30+ member team for operations, documentation, and events. - Developed strong leadership, project management, and organizational skills. - Handled social media, increasing the incubator's follower base by 33%+ through coordinated content and outreach.	
Intern, Clinical Pharmacology & Pharmacovigilance Department, Sun Pharmaceuticals, Gurugram	Jan - Feb 2025
- Supported BA/BE study workflows and clinical data evaluation. - Operated analytical instruments under quality-controlled and regulated lab conditions, strengthening attention to detail, documentation, and data reliability. - Contributed to regulatory-aligned documentation, reinforcing good record-keeping and compliance practices.	

TECHNICAL & SOFT SKILLS

- Clinical Research:** REDCap, CRF/eCRF Review, Source Data Verification, ICH-GCP, ALCOA+.
- Bioinformatics:** BLAST, Clustal Omega, MEGA X, Swiss-Model, GOR IV, ORF Finder, SnapGene.
- Programming/Data:** Python, C, Basics of ML and biostatistics, MS Office suite.
- Operations:** Project Coordination, Documentation, Event Management, Startup Operations.
- Leadership & Communication:** Event coordination (30+ team), stakeholder engagement, scientific writing, public speaking (multiple debate/declamation wins).
- Laboratory:** DNA Isolation, Electrophoresis, Spectrophotometry, Microbial Culture, Enzyme Assays, Immunotechniques.

PROJECTS

AI Cognition & LLM Behaviour Studies	Aug 2026
• Ran small experiments comparing LLM summaries vs. original articles and built a hand-coded social-media comment dataset on mental health. • Compared human vs. LLM labels for various factors, highlighting cognitive offloading. • Developed strong skills in operationalizing abstract constructs & conducting human-AI comparative analysis with lightweight computational tools.	

Agro-waste based Adsorbent Beads for Industrial Bioseparation	May - Jun 2026
• Developed a concept for a portable, multilayer agro-waste-derived biochar as an adsorbent. • Explored biochar's potential for removal of contaminants and promoting agricultural waste valorization and sustainable treatment approaches. • Focused on developing a low-cost, field-deployable purification solution with potential applications in rural and resource-limited settings.	

In-Silico Molecular Cloning & Computational Sequence Analysis (Team of 4)	Jan - Feb 2025
• Designed and simulated molecular cloning workflows using SnapGene. • Performed sequence analysis interpreting computational results. • Strengthened skills in biological data handling, alignment, and computational modelling.
